SUPERVISORY TASKS ACTIVITY GUIDE

Activity: assessing implementation of critical supervisory tasks.

Working in small groups of 4 to 6 and referring to Handout #3 and the critical supervisory tasks associated with implementation of the Open Systems Model, identify and assess the following:

(a) Identify the strengths that you possess that help you to attempt to implement the critical tasks associated with the Open Systems Model, and

(b) Identify what you are presently doing to put into practice the critical tasks associated with the Open Systems Model, and

(c) Scale the overall degree of implementation in your unit of the critical tasks associated with the Open Systems Model, with "0" meaning not at all and "10" meaning fully implemented,

        not at all   fully implemented
               0 -----1-----2-----3-----4-----5-----6-----7-----8-----9-----10

(d) Identify what would be required to raise the level of implementation one point on the scale focusing especially on what you can personally do.
